To ensure the availability of global Enterprise Architecture standards, competencies and professionalism that will enable our customers to realise major value in their business and practices

– Judith Jones - CEO, Architecting the Enterprise Ltd.

Overview

Architecting the Enterprise Ltd is at the forefront of the move from IT to Enterprise Architectures and plays a strategic role in The Open Group's Architecture Forum and leads a number of the current TOGAF initiatives.

The key assets of Architecting the Enterprise Ltd are its highly skilled and experienced people who are closely connected with Enterprise Architecture standards and practice development. These strengths enable us to provide Enterprise Architecture through leadership and best practice advice to our customers.

Architecting the Enterprise Ltd is seeking to establish professionalism amongst the Enterprise Architecture practitioner community. We are achieving this goal by providing high quality consultancy and training services for organisations developing effective Enterprise Architectures.

We have championed the use of TOGAF as a best practice framework and are proud to have trained over 65% of all current TOGAF certified practitioners world-wide.

Judith Jones
CEO, Architecting the Enterprise Ltd.

Why is Enterprise Architecture necessary?

Enterprise Architecture provides the foundation for businesses to achieve competitive advantage by enabling alignment of an organisation's Information Technology capabilities with its strategic business goals. Enterprise Architecture also helps an organisation to manage its people and processes in order to stay aligned with changes in customer demands and technology.

Business Benefits

For your organisation

- Ensures that Information Systems and Technology fully support your business processes
- Brings all functions together and shares skills, experience and knowledge
- Provides cost effective ways of developing IT infrastructure leading to a much more efficient IT operation
- Promotes a climate of continuous business evolution, improving the quality of work output (deliverables)
- Improves business flexibility by providing a clear framework, better defined structure and standards to plan

To more effectively implement a business, a plan, a strategy, or a business model we advocate learning and applying a tried and tested (Fortune 50 and Global Forbes 50 companies) methodology

Business Drivers

Enterprise Architecture tools, such as TOGAF, enable organisations to be much more agile in the situations such as:

- Merger & Acquisition
- Integrating a number of cultures disparate organisation
- Collaborative working with external parties
- Getting people within an organisation working together effectively
- Increase profitability
- Improved return on investment (ROI)
- Managing operational costs and right sizing departments
- Better utilisation of IT resources and assets
- Rapidly changing business environment
- Leveraging new technology
- Achieving compliance with Government regulations cost effectively
- New markets and business opportunities

What is TOGAF?

TOGAF is short for The Open Group Architecture Framework. It is a set of supporting tools and methods for developing a broad range of different vendor neutral IT and Enterprise Architectures. Most importantly, it breaks down your business into its essential components to enable you to design and build the right Enterprise Architecture for your needs.

Why use TOGAF

TOGAF boils down complex business processes and IT functions into a comprehensive, long-term enterprise framework that is vendor neutral and customisable to meet the specific needs of any organisation.

The benefits of adopting TOGAF

- Simplify the process of
 - planning and design of business processes
 - supporting and maintaining business systems
 - product procurement
- IT quality management
- auditing and compliance monitoring
- Help the IT function to better align its goals and strategy to corporate management and stakeholder goals
- Industry standardisation based on a recognised framework
- Continually enhanced by active involvement from major companies
- Customisable framework
- Non-proprietary and free to download from The Open Group website (www.opengroup.org/togaf)

Architecting the Enterprise Ltd can help you

Architecting the Enterprise Ltd is a global TOGAF training and consultancy service provider, with its headquarters based in the UK. It is proud to have trained and certified over 65% of current TOGAF practitioners world-wide.

TOGAF has evolved to become the leading approach for developing enterprise and IT architectures. Architecting the Enterprise Ltd aims to help individuals in their career development and organisations achieve their business objectives through providing training, mentoring and consulting.

Why work with Architecting the Enterprise Ltd.

It has helped major organizations build their Enterprise Architecture skills and practices.
